

LaDonna Rothfus

I have been an educator for the Early Childhood Education program since 2000. I started working in this department because two of my four children went through the program and we loved it. I enjoy going to Early Childhood Education workshops to keep up the date and to learn new and creative ways to teach my students. One things I have incorporated is the alphabet in American Sign Language. Children learn in many different ways. Incorporating a hand movement or action into the alphabet they are learning by doing. It's so exciting when they get it. In my spare time I love to knit, crochet and work in my garden and catch insects which I take into the classroom.
